LOGISTICS DOCUMENT CAPTURE / LOG-01

Turn logistics documents into usable business data

Capture shipment details and cargo rows from consignment notes and scans. Let operations staff check missing information before preparing data for the next system.

SOURCE DOCUMENT

Consignment CN-6107

Shipment SH-261105-014

Cargo 10 cartons / 120 kg

Rows Seal kits + sensors

REVIEWABLE RECORD

Shipment ID + parties

Cargo rows + totals

Missing fields to review

HOW IT WORKS

Capture

Read shipment IDs, dates, sender and receiver details, and cargo rows.

Review

Compare fields with the original. Check missing weights and totals.

Hand off

Prepare reviewed data for CSV / JSON export or a scoped API integration.

See your document become a data record

Start with the simulated normal, scanned and incomplete notes. For a PoC, agree the fields and output format using your own documents.
